Range News—Nancy Tidwell

SEPTEMBER 2015— Next month is the High Sierra and our team is getting everything ready to put on our annual shoot. I hope all those hunters get their deer so they can attend our shoot. I'm hearing it's not so great out there so good luck to the hunters hope to see you at the shoot. However members there is no excuse you should be there to help.

WORK PARTY OCTOBER 3 and 4 7 A.M. TO ???

This is a good time to bring your trailer up as well, so it is here for the end of the month.

We have a list of things we need to get done for the shoot. Corene will be organizing this and posting it on the wall at the range.

- Weed around the trails
- Clean up the water faucets
- Clean Clubhouse
- Clean outside Clubhouse
- Clean Horseshoe area
- Level shooting areas
- Sealant on playground set

Thanks...Nancy

Notes from the Editor—Nancy Tidwell

SEPTEMBER- I took my youngest grandson, Wyatt, to the range for a day away from Bakersfield. I expected to find the playground in "bad" shape as normal. BUT I found it to be very clean. The weeds were gone and the cat poop was not under the play yard set. I would like to thank Nick Wiruth for taking

the time to clean the play area. This was a huge job. I know because I do it a lot.

The kids appreciate it.

I drug the practice area last week, the food stands will need to be cleaned up. The target areas look pretty decent. We will have a two day work party on October 3 and 4. Pick a day or attend both. The 3D's will take a good weekend to prepare. There are a lot of dead trees this year. There is one on target 4 that will fall across the target we need to bring down.

1. NEVER point a bow and arrow at another person.
2. NEVER shoot an arrow straight up into the air. You can end up hitting another person or yourself.
3. NEVER shoot an arrow off into the distance where you cannot see where it will land. You could end up hitting another person.
4. If you are looking for a lost arrow behind a target, leave your bow leaning against the target face so it can be seen or have another shooter stand in front of the target to prevent others from shooting.
5. On a field archery or 3D course stay on the marked path and travel in the direction in which the targets are laid out while shooting is in progress. Going cross country could land you in the path of an arrow.
